The first question is moot here, as this algorithm is precisely Fibonacci's definition of  $F_n$ . But the second demands an answer. Let  $T(n)$  be the number of computer steps needed to  $n$ .,. And 01~~

~~Vazirani is the GOAT. This book reads like him whispering sultrily into your ear. It's actually a joy to read and doesn't "feel like a textbook." The book is surprisingly slim, and the chapters feel just as long as they need to be. He taught my Algorithms class, and a number of of our homework problems came from the exercises in this book.~~
