Investing in new equipment is called capex, while consuming storage in the cloud is mostly opex, since bills are paid monthly and based on usage (a cost for operating the cloud, rather than the physical hardware). The purchase of a highly performant on-premises storage system can cost as much as \$100,000.

Access Free Cloud Data Centers And Cost Modeling A Complete Guide To On-Premises Vs. Cloud: The Cost Comparison

The data centers used to create cloud services represent a significant investment in capital outlay and ongoing costs.

Accordingly, we first examine the costs of cloud service data centers today....
