ringspots on mature fruit (Figure 19). Foliage also can be affected; plants are usually stunted and tip leaves show a purplish discoloration (Figure 20). Thrips, which are small (1□

### Tomato Diseases and Disorders - UCANR

This destructive disease of tomato foliage, petioles and stems (fruit is not infected) is caused by the fungus *Septoria lycopersici*.

Infection usually occurs on the lower leaves near the ground, after plants begin to set fruit. Numerous small, circular spots with dark borders surrounding a beige-colored center appear on the older leaves.

observation, identification and control. [Dominique Blancard]

A colour atlas of tomato diseases : observation ...

Gray leaf spot affects mainly the leaves of tomatoes, starting with the oldest leaves, although it can also infect the stems on the plant.

2 □ It does not infect the fruit, although the disease can be harbored in the seeds of the infected plant. Symptoms: Small, dark spots that can be seen on both the top and bottom surfaces of the leaves.
