Engineering Graphics DO YOU KNOW ? When three co-ordinate planes V.P., H.P and P.P. (profile plane) or side plane are kept perpendicular to each other, Octant is formed as shown below : The principle of projection in an Octant is same as the principle of projection in a quadrant. An equilateral triangle of 40mm side has its V.T parallel to and 20mm above XY. it has no H.T. Draw its projections when one of its side is inclined at 60° to the V.P A 45° set square rests on the ground on the 90° corner in such a way that the two sides of length 50mm each containing the corner are equally inclined to the ground.

ME 111: Engineering Drawing

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing.Usually, a number of drawings are necessary to completely specify even a simple component.
