What is a Male Cystoscopy procedure? A Male Cystoscopy procedure is a simple procedure during which your doctor will insert a well-lubricated, instrument called a male cystoscope through your urethra and into your bladder for a visual examination of the bladder.. It also allows your doctor to remove small pieces of tissue for later examination and even to crush small bladder stones, should any ...

[Male Cystoscopy - "BEST" VIDEO PreOp Patient Education ...](#)

Cystoscopy. A cystoscopy is a test to look at the inside of your bladder and tube that carries urine from your bladder out of your body (urethra). It uses a thin tube called a cystoscope. There are different types of cystoscopies: flexible cystoscopy; rigid cystoscopy; blue light cystoscopy or photodynamic diagnosis (PDD)

[Cystoscopy | Tests and scans | Cancer Research UK](#)

There are 2 types of cystoscopy: a flexible cystoscopy and a rigid cystoscopy. Both involve passing a thin viewing tube called a cystoscope along the urethra (the tube that carries pee out of the body) and into the bladder, but they're done in slightly different ways.
