more about Red Panda by reading this book.

The whole world loves panda bears. Everyone loves to watch them play, climb, cuddle, and chew. But careful, they can scratch too—just look at that tree! Pandas live in wild places very far away, and they are the STAR ATTRACTIONS of every zoo that keeps them safe and well, all over the world. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

there? The history of red pandas and humans The genetic debate Red pandas as pets Conclusion Introduction The red panda is probably one of the cutest creatures around, easily tying with the giant panda. But why are they both called pandas if they look so incredibly different? And what makes the red panda different from, say, a raccoon? Red pandas are unique animals all their own. They live in Asia, towards the East, and they have been a more recent favorite animal of many children and adults. Unlike its name-sibling the giant panda, the red panda receives less attention than many endangered animals. However, it is also one of the more common zoo animals, since red pandas do so well in zoos. What

makes the red panda an animal worth knowing? There are a lot of answers to that question, and we will cover them in this book.

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals—especially those that are endangered. His powerful message, conveyed with humor, compassion, and art— to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species,

with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.
