Microsoft Access supports two file formats, .mdb and .accdb. Access 2000, 2002, and 2003 share the same .mdb file formats. ACCESS2000, ACCESS2002, and ACCESS2003 are treated as aliases for Access in SAS. For an existing .mdb file, you can specify DBMS=ACCESS on Windows platforms and SAS identifies the version for you.

~~SAS Help Center: Microsoft Access Database Files~~

n Starting in SAS 9.4, SAS/ACCESS can export Excel .xlsx files directly to UNIX. In this release, you can specify DBMS=XLSX to read and write to Excel workbooks under UNIX and Microsoft Windows directly without going through the SAS PC Files Server. n Beginning in SAS 9.4 SAS/ACCESS imports data from JMP files saved in JMP 7

SAS with stored access policy: A stored access policy is defined on a resource container, which can be a blob

Read Online Sas Access Document

container, table, queue, or file share. The stored access policy can be used to manage constraints for one or more shared access signatures. When you associate a SAS with a stored access policy, the SAS inherits the constraints—the start time, expiry time, and permissions—defined for the stored access policy.
