This fully revised and updated second edition of Information Systems Strategic Management continues to provide an accessible yet critical analysis of the strategic aspects of information systems. The second edition again covers the relevant practical and theoretical material of information systems, supported by extensive case studies, student activities, and problem scenarios. The ISS issues will be fully integrated into current thinking about corporate strategy, addressing the fact that a range of emerging strategic issues are often ill addressed in IS strategy books, which also fail to differentiate between IT, the application of technology, and IS, the participative, human-centred approaches to information and knowledge management. studies on this topic have generally adopted a purely account-based or strategy-oriented approach to address this issue. However, this book draws upon a number of well-defined theoretical and empirical backgrounds and methodologies. Since the 1980s, many changes have occurred and companies have increasingly focused their strategies on value creation. Consequently, new strategic directions have emerged, especially for managerial accounting. Management accounting and alignment with strategy could thus improve performance. This book encourages further thought and reflection on these issues which should be pursued in the future as firms face new challenges associated with the acceleration of digital transformation.

The nature of the communicator's job has changed dramatically over the last decade. While communicators still prepare speeches, press releases and articles for corporate magazines, they are now being asked to perform managerial duties such as planning, consulting stakeholders and advising CEO's and vice presidents. Communication Planning focuses on these additional responsibilities and examines the role of integrated planning in modern organizations. Sherry Ferguson's comprehensive study includes the theoretical foundations of communication planning and strategic approaches to planning for issues management.
