Magdalenian culture in the Ice Age. The Magdalenians were prehistoric humans that lived in Europe between 23,000 and 14,000 years ago, towards the end of the last Ice Age (which geologists call the Pleistocene epoch). The Magdalenian era saw a flourishing of early art, from cave art to the decoration of tools, and the engraving of stones and bones.

The unique map shows the world as it would have looked 14,000 years ago, when the ice age was at its harshest. Designers worked with geologists to accurately map the massive landbridges and ice...

Incredible map reveals how world looked during the ice age ...

There have been at least five major ice ages in the Earth's history (the Huronian, Cryogenian, Andean-Saharan, late Paleozoic, and the latest Quaternary Ice Age). Outside these ages, the Earth seems to have been ice free even in high latitudes; [34] [35] such periods are known as greenhouse periods .

The Prehistoric Ages in Order: How Humans Lived Before ...

The Cenozoic Era, this mammalian period, includes prehistoric man and many warm-blooded animals, such as “Ice Age” woolly mammoths, giant sloths, saber-toothed tigers, and (my favorite) glyptodonts. Scientists see that the Cenozoic Era began with a rapid explosion of unique life forms—and they have trouble explaining what would have caused it.

This original creation of Earth contained the world of dinosaurs and such prehistoric beasts and sea monsters that, if they were around during the age of man, would have quickly rendered him extinct. And this was the world that, as science has proved, came to a mysterious, cataclysmic end! Evidence exists of vast, planet-wide destruction, apparently relating to asteroid impacts, as well as volcanic eruptions and sea-level changes.

temperatures known as an Ice Age. Each of these frigid periods lasted from 10,000 to 50,000 years.

Prehistoric Times [ushistory.org]

The Bronze Age forms part of the three-age system for prehistoric societies. In this system, it follows the Neolithic in some areas of the world. While copper is a common ore, deposits of tin are rare in the Old World , and often had to be traded or carried considerable distances from the few mines, stimulating the creation of extensive trading routes.
