[Will 5w30 Oil Hurt My Engine In Ford Escape File Type](#)

It calls for 5W-30 motor oil. But he has some 10W-30 in his garage, so he uses it to change the oil. No sense wasting good oil. Engines are built to use a certain viscosity of motor oil. Today ' s advanced engines are built with much tighter tolerances than their predecessors. The clearances between the crankshaft journals and main bearings are tighter, for one. This is purposely done to allow ...

[What Happens if I Use the Wrong Weight \(Viscosity\) of Oil ...](#)

Thank Kevin Synthetic oil with a viscosity rating of 0W-20 is specified for your vehicle. 5W-20 is acceptable as well. 5W-30 will not harm your engine. Use of 5W-30 might add some additional cost in terms of reduced fuel economy due to use of the higher viscosity oil.

[I accidentally put 5W-30 in my 2016 Camry instead of 5W20...](#)

As 5W30 motor oil is thicker it will offer more resistance than 5S20 in cooler temperatures. This will lower the horsepower output and fuel economy. If the engine components are specifically designed for 5W20 motor oil then you risk engine damage using 5W30.

[5w20 vs 5w30 Motor Oil Comparison & Analysis](#)

5w30 is a great multigrade oil for use in low starting temperatures as well as high summer temperatures. It is also more fuel efficient since it creates less drag on the bearings and moving engine parts. 10w30 is thicker and may provide better sealing capability for older engines.

[5w30 vs 10w30: What Oil Companies Don't Tell You - HCDMAG.com](#)

ps: If you take a winter vacation to Fargo, ND, I would suggest that you have your oil changed before the trip, and in that case I would specifically ask for 5W-30. However, even if you end up on Fargo unexpectedly, just give your engine a minute or two of idle time after start to let the oil limber up as it flows and warms up.

~~Will it harm an engine to use 10W oil when it calls for 5W ...~~

I'd like to add that I saw on a B&S site I saw that it said "*Synthetic 5W-30 -20 to 120 ° F (-30 to 40 ° C) provides the best protection at all temperatures as well as improved starting with less oil consumption." I know that's Briggs and not kholer but they can't be that different.

~~5W-30 or 10W-30 | Lawn Mower Forum~~

In this case, 5w30 oil will provide better overall engine protection than 5w20. 5w30 is also one of the most widely used types of motor oils for two main reasons, namely because it works great with a diverse selection of vehicles with different engine types, and the oil also covers a broad range of possible temperatures, but, as explained above, is ideal for warmer temperatures.

~~5w20 vs 5w30 - Everything You Need To Know~~

So running 5W-30 will not hurt the engine at all but may lower your fuel economy slightly. For an older truck with some engine wear, it may even help lubricate better than the slightly thinner 5W-20 oil. Startup is actually the worst time for engine wear when there's just a thin film of unpressurized oil between metal parts like bearings.

~~5w30 accedently instead of 5w20? | Ford~~

Yes, a lower viscosity oil like 5w20 will provide less protection than 5w30 in normal operating conditions. However, a lower viscosity oil is better in areas of the country with lower average temperatures and below freezing conditions. Editor ' s Note: You should always use the oil recommended by the vehicle manufacturer.

~~5w20 vs 5w30 - Which Grade Motor Oil Should I Use ...~~

The 30-grade oil is more fluid than the 40-grade oil but provides less pressure than 40-grade oil. Economy. 5W30 provides a more fuel economy than 5W40. Usage. 5W30 can be applied in different kinds of vehicles with different ranges of working temperatures. However, it is much more suitable for cold climates. On the contrary, the 5W40 works best in warmer temperatures. Thickness. The 30-grade ...

~~5w30 vs 5w40 - Comparison & Analysis 2020 -~~

I asked this befor but I could'nt find the thread. Will driving with the 5w-30 oil hurt the engine?

~~Will 5w-30 hurt my engine | Viper Club of America ...~~

10W30 is thicker and protect older engine with its sealing capability. 5W20 is thinner multi-grade oil that is pertinent for quick starts in the lowest temperatures. In order to protect your car from internal damages, it is beneficial to use only specified engine oil by the manufacturers.

~~Can I Use 10w30 Instead of 5w20? What ' s the Better Choice?~~

5W30 motor oil means that the oil has a thinner consistency in cold weather and will protect your engine at lower temperatures. Also, 10W30 means the oil will be a little thicker at same lower temperatures, and will then protect the engine the same as 5W30 at higher temperatures. ' W ' means, useful for winter usage.
